

INTERNATIONAL NAVAL CONTEST 2025 - FINAL RESULT

by Alberto Mattei, IT9MRM - Contest Manager INC 2025

LOG ANALYSIS CRITERIA:

The criteria used for **all received logs** is the following:

- incorrect or partially incorrect callsign = 0 points;
- incorrect or partially incorrect naval ID = 0 points;
- callsign associated with a non-existent naval ID (assuming the list is not updated) = 10 points;
- portable callsign (/p) or (/qrp) associated with a correct naval ID = 10 points;
- callsign associated with an incorrect naval ID = 0 points.

NAVAL LOG STATISTICS NOT RECEIVED:

Number of stations belonging to naval associations/clubs that were connected but did not send their logs for comparison with other stations:

ARMY: 29 naval stations;
HNARC: 6 naval stations;
INORC: 5 naval stations;
RNARS: 8 naval stations;
MARAC: 1 naval station;
MF: 47 naval stations;
YO-MARC: 1 naval station;
MFCA: 4 naval stations;
FNARS: 5 naval stations;
NRA: 0 naval station;

CHECKLOG:

IQ9AAD - IQ9AAI - DL2BRN - IU1PFA

IMPRESSIONS:

The naval contest is an opportunity where many European naval stations come together to compete against each other and meet every year in this wonderful naval world. 160 logs were received, one of which was in an Excel spreadsheet, and a couple sent in ADIF format (which I promptly changed to Cabrilo). The four SWL station logs were checked separately.

The program used to check all logs was "**OH1NAVY NAVAL CONTEST LOG INSPECTOR v.3.9.2**" the program created by Veikko OH1MIE (also the creator of the naval contest software OH1MIE - NAVAL CONTEST LOGGER 3.7.0.64). The program automatically cross-checks the connections made with other stations that have submitted their logs, automatically displaying the score and immediately highlighting incorrect or defective stations. Using a pop-up button, the contest manager can choose whether or not to assign a score (only for connected stations listed as failing stations).

The scoring criteria is listed above.

The contest manager program created by Veikko is very powerful and very fast at calculating contacts, and diploma management is also automatic.

Using this program has certainly facilitated and speeded up the management and preparation of the rankings, which are essentially instantaneous (in Excel format). For future INC contest managers, this is a valuable piece of software! The other software, the one used by NAVAL for contest management, was also created by Veikko, and this year its use by users has increased by at least 35% compared to last year. Many still use other systems (perhaps more powerful), but less up-to-date.

I remind you that the NAVAL CONTEST LOGGER is updated with the latest operators registered in the various associations, and in any case, the contest manager on duty updates his own member database. It's a shame that some clubs' member lists aren't updated on their websites, where they're actually retrieved by the contest manager to update the system.

In the future, I recommend updating the members' web pages at least a few months beforehand and, very importantly, sending the list of active members to the contest manager on duty so he can easily update the system.

I've done my best to update the ones listed on the websites (ARMY, INORC, MFCA, MF, MARAC, NRA, YO-MARC), but unfortunately I've had a lot of difficulty with the RNARS ones, which aren't public and aren't listed on their website.

I noticed that many were reporting the wrong NAVAL IDs for their correspondents on the logs they received. However, those who used the NAVAL CONTEST LOGGER had no problems, since it automatically displayed the correct NAVAL ID for each connected station.

So once again, I urge those who haven't already done so to download the program and use it in the future. It's very easy, very intuitive, and it gives you the ability to automatically send the log to the contest manager's cloud.

Thank you all for your participation.

A heartfelt thank you to Veikko for his availability and for creating the programs we needed for our NAVAL CONTEST.
